*The purpose of Public University to seek academic excellence of each and every student, to perfect its professors, to train its students for them to fit into the labor market, to carry out technological and scientific investigations, is not contradictory at all but complementary to its social responsibility to cater for the needs of national and regional development. Public Universities seek redistribution of knowledge and improvement of living standards of community as a whole.*

**Ana Jaramillo**

## **Introduction**

We present, through this Postgraduate Students Guide, a short overview about curriculum offered at National University of Lanús.

As per our Statute, University has a primary mission: “To contribute through production and distribution of knowledge and scientific- technological innovations to economic, social and cultural development of the region aiming to improve living standards and strengthening democratic values within society, combining universal knowledge with knowledge acquired from our community.”

It is, within this frame, that the postgraduate offer is organized in Seminars, Specializations, Masters and Doctorates, which are meant to meet the mission of the University producing socially relevant knowledge with outstanding theoretical and scientific academic level.

Academic offer is organized around the four Departments within which each career is registered. In each case, the present Guide presents in a systematic way the Career Objectives, Study Plans, Graduate Profile and contact information.”

## **The National University of Lanús, brief Historical Review.**

The National University of Lanús was created by Act 24496 June 7<sup>TH</sup> 1995. In September of the same year National Government appointed Ana Jaramillo, Sociology Ph.D as Rector and Organizer of the University. In December 1995, the premises located at “29 de Septiembre” St. were transferred as per Acts 24750 and 24751. The Campus has a surface of 12 hectares being one of the most important green spaces within the area.

As Rector Ana Jaramillo said: *“National University of Lanús was once a dream, now it is a reality. We all built it. We keep on building it every day. A collective and supportive project meant to fulfill its social responsibility of forming professionals with the highest degree of academic excellence. Intellectuals, technicians and citizens, working alongside the community, making their best effort to improve living standards.”*

## Specializations

Universidad Nacional de Lima

## Specialization in Methodology of Scientific Research

---

Certified. “C” Category.

Headmaster: **Dra. Cristinina Ambrosini.**

Career commenced in the year 1999.

Degree obtained: **Specialist in Methodology of Scientific Research.**

Duration: 1 year. Distance learning mode.

### **Professional Outlook**

Enhance knowledge by dealing with technical and disciplinary fields not contemplated in basic university education. Typify phases or instances of the research process: planning, formulation, object design and proceedings design. Manage essential logical relations for methodological applications. Define concrete research fields by extracting significant data for further processing and analysis. Select and assess processes for methodical conduction of treatment and interpretation of

information. Formulate and assess research projects aimed at interdisciplinary design.

### **Syllabus**

Module Logic applied to research.

Module Foundations of Scientific Knowledge.

Module Research Methodology.

Module Data Processing and Analysis.

Final integrated Exam.

Elaboration of Final Integrated Project.

### **Graduate Profile**

Graduates of this specialization present an eminently professional profile and are trained to:

Take part, direct, and assess research projects in the field related to their professional training;

Contribute to the education of human resources as regards methodological aspects.

Teach essential and/or advance lessons about epistemology and methodology.

Write articles, reports and other forms of scientific and technological transfer.

## Master's Degrees

# Master's Degree In Methodology Of Scientific Research (Distance-Learning Mode)

---

Certified. "B" Category.

Headmaster: **Dra. Cristina Ambrosini**

Career commenced in the year 1999.

Degree obtained: **Master's degree in Methodology of Scientific Research.**

Duration: 2 years. Distance-learning mode.

## Professional Outlook

A Master's degree in Methodology of Scientific Research is, nowadays, properly adequate due to the growing need of skilled professionals within the labor area. Professionals who can actively participate in scientific research, either by taking part in interdisciplinary teams, formulating projects or by assessing designs and work programmes of other teams, or by enriching educational activities. In order to effectively perform these activities it is necessary to have appropriate training which is not generally included in university courses. Such training must include the reflection about characteristics of scientific knowledge as well as

about the methods of production of knowledge in its interaction with the rest of social practices which form our particular history.

## Syllabus

Epistemology and Logic Applied to Research.

History of Science.

Methodology of research.

Data Processing and Analysis.

Research Administration and Management.

Thesis Seminar.

Elaboration and defense of Thesis.

## Graduate Profile

Graduates have a solid academic profile and are trained to:

Advise research groups on matters related to elaboration of designs and research projects. Take part or conduct research projects consistent with their professional skills. Lecture about the essentials of the aforementioned matters.

Manage undergraduate careers and postgraduate courses. Be member as jury for the process of public selection of university

professors, undergraduate and graduate thesis defense. Present epistemological theoretical frameworks in support of methodological research and teaching activities developments. Design, execute and assess research projects within the framework of different scientific fields. Actively participate in science management projects. Partake, with consistent and well founded arguments, in the contemporary debate about scientific and social crisis of our time within the academic field and in many public opinion fora.
